lights for pools and spas

sleek
modern
powerful
innovative
effortless

sleek

- Recessed design for minimal projection into pool.
- Protrudes only 18mm for concrete installation, 22mm for fibreglass installation.
- Pool cleaner friendly.
- Compact diameter: 164mm concrete, 174mm fibreglass.

powerful

- Available in Halogen or Award winning Ceramic light engine.
- For a comparison between Ceramic light engine and halogen lighting please refer to www.spaelectrics.com.au

Award winning Ceramic light Engine

Model: WN9 Series

- Most efficient and brightest pool light on the market.
- LED life 70,000 hours approx.
- A unique combination of ceramic and LED technology (advanced Titan series) allows for excellent heat dissipation resulting in maximum light output.
- Kind to the environment, operates on 70% less energy than a normal halogen light.

innovative

- Unique electrical connection so power cable does not enter into light cavity eliminating possible sources of water entry.
- Slotted rim allows water to flow behind the light to eliminate stagnant water and also aids in cooling.
- Designed and manufactured in Australia.
- Rated to IPX 8.
- Detachable plug for ease of servicing and Retro fitting.

modern

- Choice of rim colours to match your pool or spa interior, including stainless steel (optional).
- All Ceramic Light Engines are supplied with a clear rim to maximise light output, coloured clip on rims are supplied separately (part no's. WN904 & WN904F).
- Interchangeable coloured lenses available (Halogen only).
- Suitable for concrete and fibreglass pools.
- Slim line appearance.
- Ceramic light engine available in blue, green, white and multicolour.

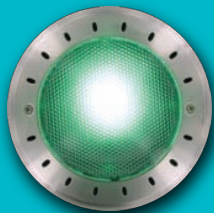

effortless

- Simple installation, refer to website.
- Correct length of cable supplied to reduce voltage drop and ensure maximum light output.
- No globe changing required for the ceramic light engine series.
- 12 month warranty.

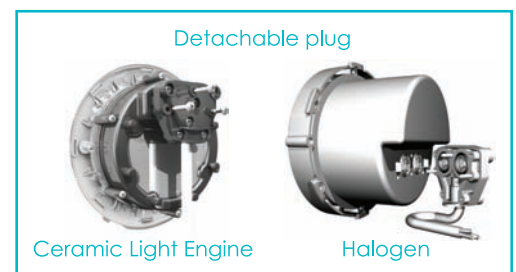

Halogen

Model: WN2 Series

- Extra low voltage high quality 12v, 100w quartz halogen globe with ceramic connector.
- Engineered lens and reflector to maximise spread of beam and light output.
